

## FCS II COMPATIBILITY KIT TAB INFILL

Code: 10933

€ 12,00

**FCS**

### FCS II COMPATIBILITY KIT TAB INFILL

To fill the gap between the front tab of the original (dual tab) FCS fin and the front of the FCS II plug front slot.

#### DESIGN

FCS II Compatibility Infills are designed to fill the gap between the front tab of the original (dual tab) FCS fin and the front of the FCSII plug front slot.

These infills are made from high quality silicone rubber which will not damage the plugs or fins (they are also extremely durable, light and built to withstand extreme temperature and corrosive conditions).

The FCSII Compatibility Kit includes:

- Centre Compatibly Infill (x1)
- Side Compatibility Infills (x4)
- Grub Screws (x10)
- FCS Key (x1)
- Reusable zip lock bag

#### FAQ

Will my old FCS (dual tab) fins work with the FCS II system?

Yes, you can use all your existing FCS fins with the FCSII system. The FCSII plugs are backwards compatible - grub screws can be used within the FCSII plugs to secure your existing dual tab FCS fins.

FCS has designed a set of unobtrusive silicone infills to fill the gap created by the old fins in the new system. The infills are made from high quality silicone rubber which will not damage the plugs or fins. They are also extremely durable, light and built to withstand extreme temperature and corrosive conditions. The infills replicate the flush leading edge of the new fin design improving the performance of the old fins.
