

FIREWIRE LOW RIDER TRACTION PAD 3 PIECE CHARCOAL BLACK

Code: PADF-T-3A-BKCH

€ 54,60

FIREWIRE LOW RIDER TRACTION PAD 3 PIECE CHARCOAL BLACK ALGAE FOAM

Subtle and simple, the Lowrider was created to enable grip and control on the deck of any surfboard, for surfers who want to maintain sensitivity between their back foot and the deck of their surfboard.

A more natural feeling when compared to larger tread patterns, the Lowrider is a favorite when seeking enhanced control without sacrificing flow and finesse.

With a low incline tail kick trimmed at the heel and toe edge of either side of the pad, the Lowrider has just enough elevated surface area behind your back foot to enable turns as tight as you can drive them.

Cut from thin rectangle grooves, this pad's minimalistic approach is offset by an extra firm arch bar, creating one of our favorite Algae Traction pads yet.

2.5mm thick

Rectangle tread

Center Arch

3M adhesive backing
