FUTURES FINS AM3 HONEYCOMB THRUSTER SMALL

The AM3 Honeycomb designed by legendary shaper Al Merrick of Channel Islands Surfboards, is a small size thruster in the Rake template category. Intended for lightweight surfers to perform in all conditions, the honeycomb construction offers a balanced flex pattern. The template's extended rake is ideal for powerful carves and the thin tip provides for optimal release off of the top.

HONEYCOMB

A lightweight hexagonal core gives these fins the feel of glass-ons. Engineered with a medium flex pattern, these are stiffer than Blackstix but more flexible than Fiberglass.
