FUTURES FINS MACHADO SIGNATURE CARBON/BAMBOO THRUSTER Medium

The Rob Machado signature fin was designed by California style-master Rob Machado with a combination of carbon and bamboo materials, giving this fin a unique flex pattern that is similar to the Blackstix fins while the V2 foil helps in generating speed. Machado's fin has a balanced template, allowing it to perform in a variety of conditions.

V2 FOIL

A V2 Foil is a V. Foil and Flat Foil blend. It takes the best speed generating attributes of the V. (at the base) and transitions into a flat foil in the tip for a controlled release in critical turns. Try the V2 foil if you are transitioning from flat sided fins. The benefits of the V. foil base will be noticeable but the change for your muscle memory will not be too drastic.

CONSTRUCTION

CARBON / BAMBOO

Carbon / Bamboo combination is similar to a Blackstix, but with more Carbon throughout and the addition of the Bamboo layer it's stiffer and more responsive.
