FUTURES FINS STRETCH QUAD HONEYCOMB MEDIUM

The Stretch Quad was designed by Santa Cruz shaper William 'Stretch' Riedel to generate speed and drive. The honeycomb material combined with a concave foil on the front fins provide a softer flex pattern ideal for building speed, while the inside fins include Stretch's unique beak-tip template to provide ultimate performance.

FOIL

V2 FOIL

A V2 Foil is a V. Foil and Flat Foil blend. It takes the best speed generating attributes of the V. (at the base) and transitions into a flat foil in the tip for a controlled release in critical turns. Try the V2 foil if you are transitioning from flat sided fins. The benefits of the V. foil base will be noticeable but the change for your muscle memory will not be too drastic.

CONSTRUCTION

HONEYCOMB

A lightweight hexagonal core gives these fins the feel of glass-ons. Engineered with a medium flex pattern, these are stiffer than Blackstix but more flexible than Fiberglass.
