INDIO ENDURANCE LOG MACHINE 9'6"; LONGBOARD PINK
The Classic Nose rider

This board was designed to perform as the classic single fin longboard which means cross-stepping from noses to tail. Combining the 50/50 rails all the way to the square tail with a deep single concave under the nose, it allows you to put your toes on the nose to make you feel like you are flying down the line. With a flat midsection for trimming and a V-kicktail for maneuverability, you can cruise from the outside all the way to the shore.

US Box Single Fin included
