€ 285,00 ~~€ 409,00~~ - 30%

TAHE 7'9 MALIBU DURA-TEC SURFBOARD

Perhaps the most versatile of the DURA-TEC range, the Malibu is an excellent combination of longboard stability and manoeuvrability, with just enough length to make it easy to control.

Its user-friendly design provides ample floatation to catch all types of waves while the performance shape enables 'down-the-line' fun for first timers to advanced surfers.

The Malibu gives lightweights and smaller surfers an easy to carry, durable and stable "big-board" feel for starting out.

However, heavier or bigger surfers will enjoy the mid-range length and proven performance for their transition to shorter boards and bigger surf conditions. Our original 7'9" Malibu gained a reputation for versatility, long-lasting and affordable surfboard.

DURA-TEC combines an ultra-durable polyethylene outer shell (like a kayak but lighter weight) with a full polyurethane foam core (like that found in traditional surfboards)

These materials are thermoformed in steel molds to ensure consistent and accurate reproduction of the original shape. Proven and long lasting with great performance, we've been making recreational wind and surf boards like this since the 1980's and many are still on the water today!

3 fins set included

DIMENSIONS

7'9" x 22.00" x 2.90";
58 L

BOARD WEIGHT

15.0 lbs / 6.8 kg

RIDERS LEVEL

Beginner/intermediate

WAVE SIZE

Small/Medium
